

The BIS@80 logo symbolises eight decades of India's journey towards quality, safety, reliability and consumer confidence. The integrated BIS emblem at the heart of the design represents the organisation's identity and its enduring commitment to standards. The flowing blue "8" reflects continuity, trust and the eight-decade legacy of BIS, while the tricolour-inspired "0" represents India's progress towards a Viksit Bharat. The map of India signifies nationwide impact, while the people and green leaves represent empowered citizens, sustainability and quality in everyday life. The surrounding icons symbolise safety, testing, technology, certification, standardisation and consumer awareness. The upward movement conveys continuous improvement, innovation and progress. The clean, scalable composition is designed to remain distinctive across digital, print, official documents, merchandise and monochrome applications, celebrating BIS as a strong foundation for a safer, more reliable and quality-conscious India.
